

EXCAVATION

CONVEYING &  
TRANSPORT

MINING PROCESSES

Mineral production requires the set up of a series of physical and chemical processes. These can happen at any time, from the excavation of the ore which contains the metal in mineral form, to the transformation of the metal. **WeeSafe** offers a range of short-term clothing for the mining industry.

## LIST OF DIFFERENT HAZARDOUS PRODUCTS MET IN MINING INDUSTRIES

Hazardous products in liquid or dry form	Operations	Recommended protective clothing
Crystalline silica	Excavation	
Coal dusts	Excavation	
Arsenic	Excavation	
Cobalt	Excavation	
Lead	Excavation	
Various solvents	Solvent extraction	
Sulfuric acid	Extraction by melting ore Leaching: extraction process	
Hydrofluoric acid	Analysis of samples taken during exploration drilling	

# PROTECTIVE CLOTHING IN THE MINING INDUSTRY

## WeeCover

SIZE : M/L/XL/XXL/XXXL

Type

5 - 6

Coverall in ultra breathable SMS material. It protects against all dangerous fine dust. The WeeCover coverall can be worn during excavation phases to protect against large amounts of suspended dust, including crystalline silica. Its loose fitting and knitted cuffs provide the operator with absolute comfort.

- Antistatic inner and outer treatment
- Zipper with self-adhesive flap
- Tight sealed seams
- A three-panel hood for an optimal mask fit
- Elasticized thumb loop for greater glove adjustment
- Breathable material for greater comfort

## WeePro

SIZE : M/L/XL/XXL/XXXL

Type

5 - 6

Combination offering optimum protection against splashing of liquid products with low chemical concentration. The WeePro coverall is also worn during beneficiation (mineral separation process) to protect against the various chemicals used. The zipper is covered with a self-adhesive flap to seal the front of the body.

- Antistatic inner and outer treatment
- Zipper with self-adhesive flap
- A three-panel hood for an optimal mask fit
- Knitted cuffs which ideally replace elastic wrist wraps
- Breathable material for greater comfort
- Collar version also available

## HIGH VISIBILITY ADDITIONAL PROTECTION

## WeePants

SIZE : XL

Type

5 - 6

High-visibility over-trousers for use in both opencast and underground mines. Traditional washable clothing may be contaminated with dangerous dust and be damaged by wear. The single-use Weepants over-trousers allows the wearer to have an unsoiled, highly visible and uncontaminated outfit.

- High Visibility
- Breathable material in SMS
- Openings on the sides to access the pockets of the work trousers
- WeePants is an over-trousers, and must be worn on trousers
